DETAILED ACTION

1. The Examiner wishes to thank the Applicant for the time and courtesies extended in the interview on July 13, 2006.

Drawings

2. The drawings were received on July 3, 2006. These drawings are accepted.

Allowable Subject Matter

3. Claims 2-20 and 22-40 allowed.
4. The following is an examiner's statement of reasons for allowance:

Claims 1-40 are allowed because none of the prior art of record discloses both (1) a plurality of DC electrical power consuming and providing entities having a first mode in which they provide more power than they consume and a second mode in which they consume more power than they provide; and (2) a pooling controller operative to vary at least one of voltage, output impedance and current of electrical power provided by at least one of the plurality of power consuming and providing entities, rather than simply connect and disconnect, or turn on and off; the entities as needed to keep the total output power constant, in combination with the remaining claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

5. Applicant's arguments, see Remarks, filed July 3, 2006, with respect to the objections and rejections have been fully considered and are persuasive. The objections and rejections have been withdrawn.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US patent of Ono et al. (6,295,487) discloses a similar system.
